(Women's Health and Aging Study, baseline interview, 1992-1995)

Unless otherwise specified, all variables have less than 2% missing data. Results are based on non-missing data.

Descriptive statistics are based on weighted data.

No ADL difficulty; disabled in two or more domains (see Chapter 1).

Item from Hearing Handicap Inventory for the Elderly-Screening Version. Ventry IM, Weinstein B. (1982). The Hearing Handicap Inventory for the Elderly: A new tool. *Ear Hear* 3:128-134.

Includes participants reporting no hearing problems in the first five items of this table.
